- Starting the diet: Follow the "Intro" from the SCD, Gaps or SCDLifestyle plans with Low & Moderate Fodmap foods. Wait 1-3 months to introduce celery root, rutabagas, cruciferous vegetables, beans, seeds, nuts (including nut flours, butters & milks) coffee, alcohol, raw vegetables/salads and raw fruit. Cook, peel, de-seed and puree vegetables & fruit at 1st. Dairy is best avoided for the 1st few weeks if unsure of its' tolerability.
- Moderate Fodmap Column Foods: limit to 1 per meal. Meal = eating separated by 3-4 hours.
- Quantity listings are adult portions: decrease amounts for children.
- Tailor the diet: individual variations from this list are to be expected- trust your body's reactions over the list.
- Tolerances change over time: periodically re-try previously intolerant foods.
- This guide is a combination of SCD, Low Fodmap Diet & the clinical experience of Dr. Siebecker in treating SIBO.
